

## SOFTWARE ENGINEER

---

### Cellicum

Cellicum is a French subsidiary of Esmertec AG, an international Swiss group (SWX/ESMN). Cellicum develops and provides interactive mobile application platforms to GSM operators.

21 operators all over the world are already using our products. Cellicum is currently pursuing its rapid growth by increasing its customer base and its product portfolio.

Cellicum is looking for :

## SOFTWARE ENGINEERS

### The position

Cellicum intends to expand its technical teams to participate in the evolution of its platforms, in the development of new interactive services and in installation projects for mobile operators in France and abroad. Cellicum provides a technically motivating environment (GSM, SS7 signalling protocol, Linux, Erlang, MySQL, web services...).

Depending on your profile, you will be involved in every stage of the project life cycle :

- requirements, design, development
- test, installation and support

You could be involved either in:

- product development;
- customisation, installation and support of platforms deployed within mobile networks worldwide.

### Your profile

With an engineering degree, you will have software development experience ideally in a telecom and GSM environment. You are dynamic, curious, autonomous and passionate about innovation and high technology. Knowledge of GSM and the information systems of mobile operators would be a plus.

Fluent English is essential.

### Salary

To be defined according to your experience.

### Location

The position is based in the Paris area and requires occasional trips abroad.
